INTRODUCTION TO ARMY OPERATIONS

PHILIPPINE ARMY • INFANTRY SCHOOL

INTRODUCTION TO ARMY OPERATIONS

Instructor’s Profile

MAJ PATRICK V MABBORANG (INF) PA

PMA Class 2015

Manila/Cagayan

Previous Assignments:

- PL, CCoy, 44IB, 1ID, PA
- Ex-O, Bcoy, 44IB, 1ID, PA
- CO ACoy , 44IB, 1ID, PA
- S3/SDO, 44B, 1ID, PA
- OG3, ETC, PA

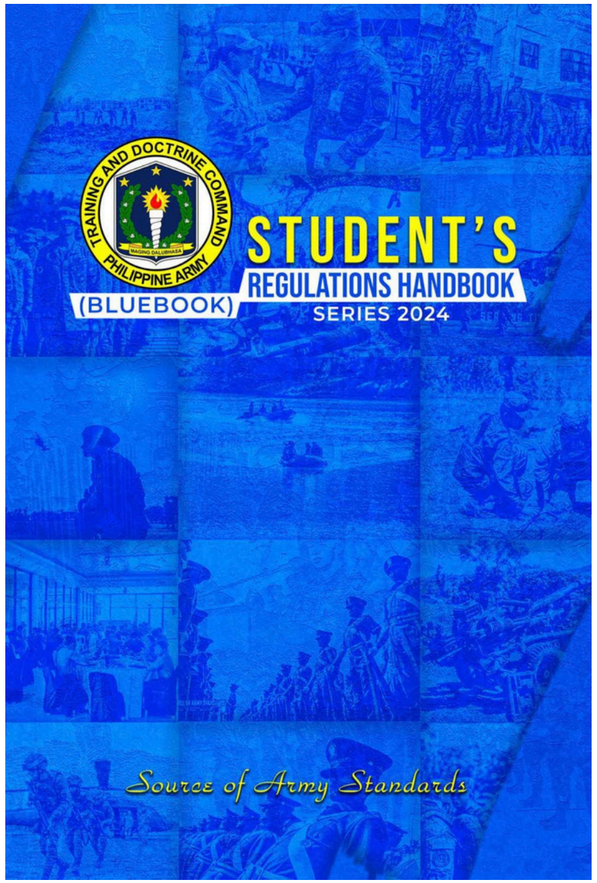
Current Assignment:

- Branch Chief, Admin Br, IS, ITG, TRACOM

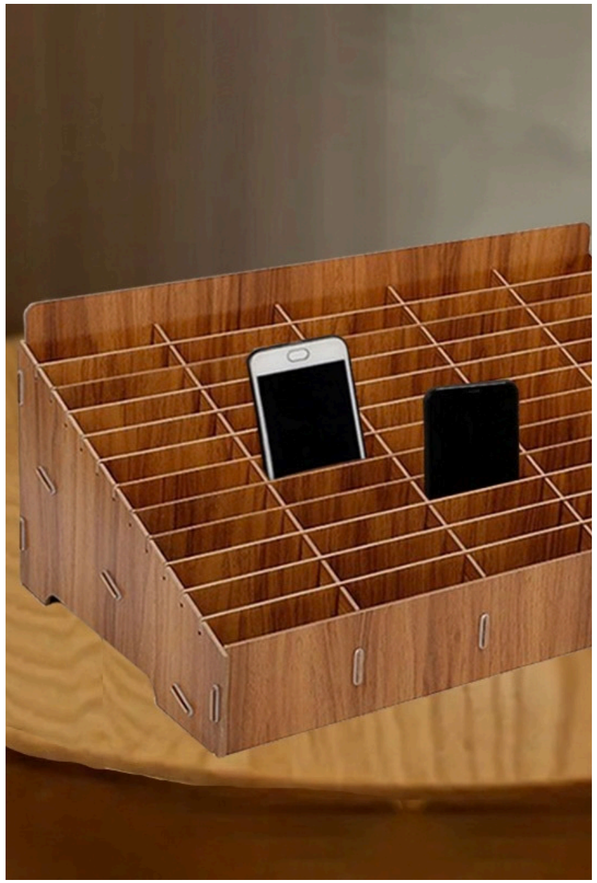
Military Education:

- IOBC
- IOAC
- FMC
- IDT

CLASSROOM RULES



All violations of regulations are covered by the Students Regulations Handbook.



All phones shall be switched to silent mode and be placed on the designated phone

Food and drinks are allowed as long as it will not disrupt/ disturb the delivery of

Students who wish to utilize the comfort room shall exit the room silently and return

SAFETY RULES

In case of fire, do not panic and proceed calmly to the designated safe area.

In case of earthquake, execute the drop, cover, and hold techniques and remain

In case of accidents, assist the victim, inform the course directorate and/ or seek

If a student is not feeling well, inform the course directorate and/ or seek medical

Objectives

TERMINAL LEARNING OBJECTIVE

At the end of this topic, students should be able to explain the **Principles of Army Operations** and the **Elements of Army Power**.

ENABLING LEARNING OBJECTIVES

At the end of the lecture, students shall be able to:

a. Define Principles of Army Operations

b. Discuss the Twelve (12) Principles of Army Operations

c. Discuss the Elements of Army Power

SESSION FLOW

Roadmap

1. EXPLAIN THE FOLLOWING

- Legal Basis of Philippine Army Operations
- Army Operational Platforms
- Elements of Full Spectrum Operations
- Tenets of Army Operations
- Elements of Army Power
- Principles of Army Operations

2 APPLICATION

3 SUMMARIZE

4 ASSESSMENT

Reference

PAM 3-00

Army Operations Manual

Legal Basis of Philippine Army Operations

ARTICLE II, 1987 CONSTITUTION

- The AFP is the protector of the people and the State.
- Its goal is to secure the sovereignty of the State and the integrity of the national territory.

Army Operational Platforms

1 Multinational / Combined Operations

- Conducted within the structure of an alliance or a coalition.

2 Joint Operations

- Involve forces of two or more services under a single commander.

3 Combined Arms

- The synchronized or simultaneous application of several Army-specific arms such as infantry, armor, field artillery, engineer, and aviation.
- Achieves an effect on the enemy greater than if each arm was used separately or in sequence.
- This was demonstrated in the Marawi Campaign.

Elements of Full Spectrum Operations

1

Offensive Operations

2

Defensive Operations

3

Support to Civil Governance

FULL SPECTRUM OPERATIONS

Offensive Operations

Combat operations conducted to defeat and destroy enemy forces and seize terrain, resources, and population centers.

PRIMARY OFFENSIVE TASKS

1. **Movement to Contact**
2. **Attack**
3. **Exploitation**
4. **Strike**
5. **Pursuit**

Defensive Operations

Combat operations conducted to defeat an enemy attack, gain time, economize forces, and develop conditions favorable for offensive or support to civil governance operations.

PRIMARY DEFENSIVE TASKS

1. **Mobile Defense**
2. **Area Defense**
3. **Retrograde**

Support to Civil Governance

Encompasses various military missions, tasks, and activities conducted in coordination with other instruments of national power to maintain or re-establish a safe and secure environment.

1. Counterinsurgency Operations
2. Peace Operations
3. Disaster Response Operations
4. Civil Population and Vital Installation Security
5. Support to Law Enforcement Operations
6. Support to Community Development Operations
7. Support to Environmental Protection and Development
8. Non-Critical Support Operations

DOCTRINE

Tenets of Army Operations

1. **Initiative**
2. **Agility**
3. **Depth**
4. **Synchronization**
5. **Versatility**

1. Initiative

Setting or dictating the terms of battle by action.

THE GOAL REQUIRES

- Creation of a fluid situation in which the enemy loses control of events.
- During offensive operations: taking the fight to the enemy and never allowing them to recover from the initial shock of the attack.
- During defensive operations: preventing the enemy from achieving success and counter-attacking to seize the initiative.
- Break the enemy’s will through relentless pressure.

THE GOAL Creation of a fluid situation in which the enemy loses control of events.

2. Agility

The ability of a force to act faster than the enemy.

AGILITY REQUIRES

- Creatively apply doctrine.
- Quickly comprehend unfamiliar situations.
- Make timely decisions.
- Units physically and psychologically capable of rapid reorientation and movement.

THE GOAL Repeated concentration of friendly strength against enemy weakness.

3. Depth

The extension of operations in space, time, purpose, and resources.

DEPTH REQUIRES

- Fight the enemy throughout the depth of his disposition.
- Adjust main effort to exploit opportunities.
- Attack of uncommitted enemy forces and support facilities.
- Retention of effective reserves.
- Aggressive projection of the current battle into the enemy’s rear areas.
- Continuity of sustainment.

THE GOAL Maintain momentum in the attack and elasticity in the defense.

4. Synchronization

The arrangement of battlefield activities in time and space to mass at the decisive point.

SYNCHRONIZATION REQUIRES

- Understanding of the complementary and reinforcing effects of combined arms.
- Knowledge of enemy capabilities and vulnerabilities.
- Careful and complete planning and coordination.
- Mastery of time-space relationships.
- Continuity of sustainment.

THE GOAL Every asset used at the decisive time and place.

5. Versatility

The ability of Army forces to meet diverse mission requirements.

VERSATILITY DEPENDS ON

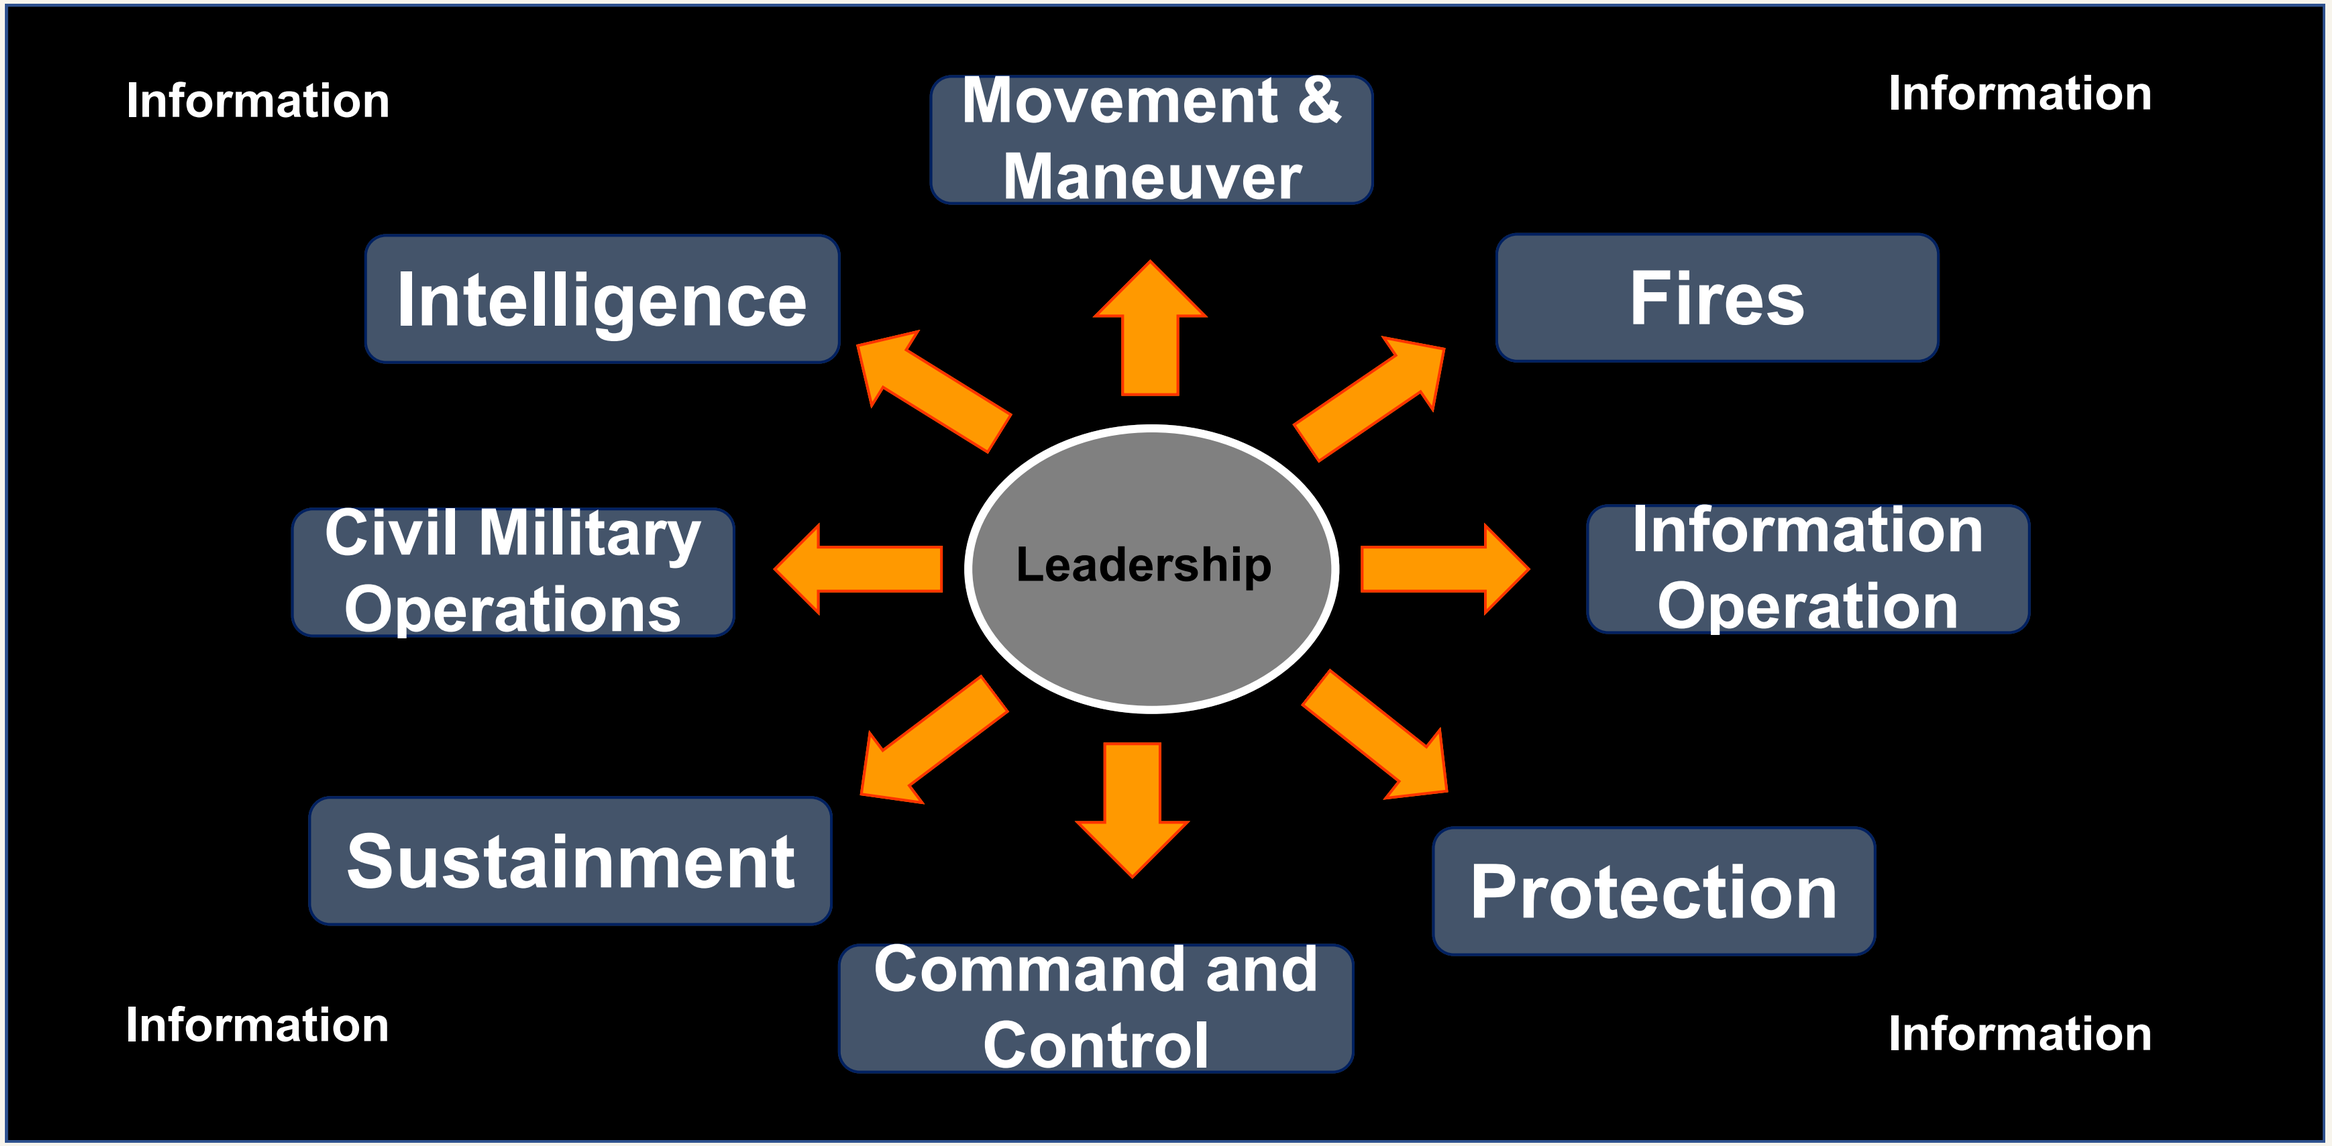
- Adaptive leaders.
- Competent and dedicated soldiers.
- Well-equipped inputs.

THE GOAL Flexible transition from one type of mission to another.

What Is Army Power?

- The summation of the potency that any total Army force generates.
- Consists of eight Warfighting Functions tied together by Leadership and enhanced by Information.
- The total means of destructive, constructive, and information capabilities that a military unit/formation can apply at a given time.

Elements of Army Power

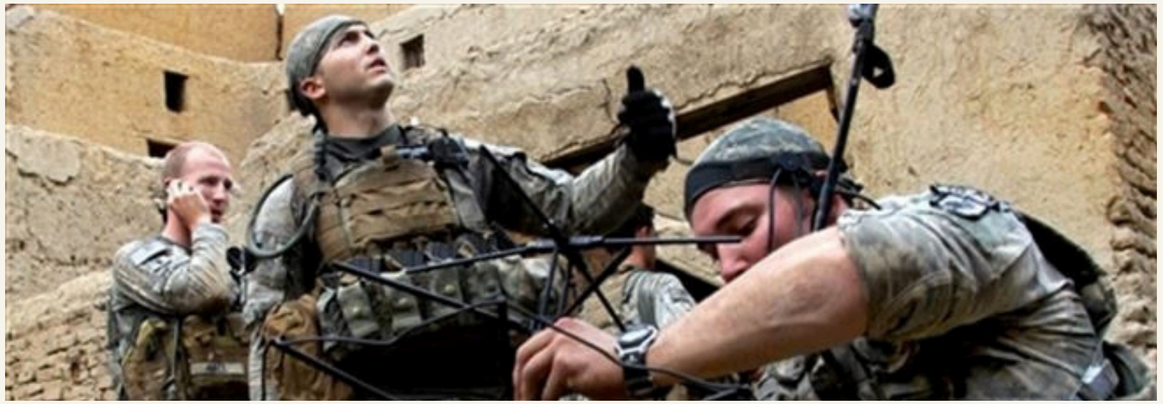


Leadership

- The process of influencing people by providing purpose, direction, and motivation, while operating to accomplish the mission and improving the organization.
- The multiplying and unifying element of Army power.
- Often the difference between success and failure.

Information

- Lethal action in determining the outcome of operations.
- It is a weapon against the enemy’s command and control and is a means to affect enemy morale.
- It is both destructive and constructive.



Warfighting Functions

A group of tasks and systems (people, organizations, information, and processes) united by a common purpose that commanders use to accomplish missions and training objectives.

1. **Movement and Maneuver**
2. **Intelligence**
3. **Fires**
4. **Civil Military Operation**
5. **Information Operations**
6. **Sustainment**
7. **Command and Control**
8. **Protection**

Movement & Maneuver

- The related tasks and systems that move forces to achieve a position of advantage in relation to the enemy.
- Includes tasks associated with force projection related to gaining a positional advantage over an enemy.
- Does not include administrative movements of personnel and materiel.

Intelligence

- The related tasks and systems that facilitate understanding of the operational environment, enemy, terrain, and civil considerations.
- Includes tasks associated with intelligence, surveillance, and reconnaissance (ISR) operations, and is driven by the commander.

Fires

- The related tasks and systems that provide collective and coordinated use of Army indirect fires, joint fires, and command and control warfare, including non-lethal fires, through the targeting process.
- Includes tasks associated with integrating and synchronizing the effects of these types of fires and command and control warfare.

Civil Military Operation

- Planned activities undertaken independently or in coordination with civilian entities.
- To gain popular support and weaken the will of the enemy to fight.

Information Operation

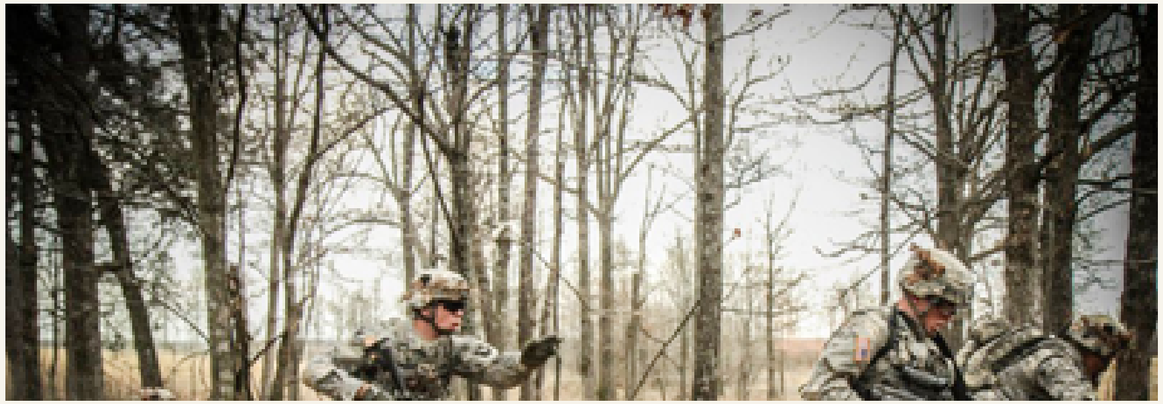
- The integrated and synchronized use of selected military and non-military capabilities.
- To affect friendly, neutral, and adversarial human and automated decision-making systems while protecting our own.

Sustainment

- The related tasks and systems that provide support and services to ensure freedom of action, extend operational reach, and prolong endurance.
- Determines the depth and duration of Army operations.

Command & Control

- The related tasks and systems that support commanders in exercising authority and direction.
- Includes tasks associated with acquiring friendly information, managing relevant information, and directing and leading subordinates.



Protection

- The related tasks and systems that preserve the force so the commander can apply maximum Army power.
- Facilitates the commander’s ability to maintain the force’s integrity and Army power.

What Are the Principles?

- Represent the most important non-physical factors that affect the conduct of operations at the strategic, operational, and tactical levels when conducting full spectrum operations.
- Summarize characteristics of successful operations.
- Powerful tools for analysis.

The Twelve Principles

1. Objective
2. Offensive
3. Mass
4. Economy of Force
5. Maneuver
6. Unity of Command
7. Security
8. Surprise
9. Simplicity
10. Perseverance
11. Legitimacy
12. Restraint

1. Principle of Objective

> *“Direct every military operation toward a clearly defined, decisive, and attainable objective.”*

- Operational and Tactical Level – all actions contribute to the higher commander’s goals.
- Strategic Level – clear vision of the end-state.

2. Principle of Offensive

> *“Seize, retain, and exploit the initiative.”*

- Offensive actions dictate the nature, scope, and tempo of operations.
- Force the enemy to react.
- Essential to retain freedom of action.

3. Principle of Mass

“Concentrate or focus the effects of combat power at the decisive place and time.”

- Mass in time = applying combat power against multiple targets simultaneously.
- Mass in space = concentrating different elements of combat power against a single target.
- Both can overwhelm an enemy or dominate a situation.

4. Principle of Economy of Force

- Employ available resources in the most effective way possible.
- Allocate minimum essential combat power to secondary efforts.
- Discriminating employment and distribution of forces.
- Accepting risk in selected areas to achieve overwhelming effects in decisive operations.

5. Principle of Maneuver

“Place the enemy in a disadvantaged position through the flexible application of combat power.”

- Concentrates and disperses combat power.
- Keeps the enemy off balance and reduces cost.
- Provides flexibility.

6. Principle of Unity of Command

- For every objective, seek unity of command and unity of effort.
- The effort follows the nested concept.
- A single commander directs all actions of all forces toward a common objective.
- Absence of a common commander requires unity of effort (joint, multinational, interagency).

7. Principle of Security

> *“Never permit the enemy to acquire unexpected advantage.”*

- Military deception greatly enhances security.
- Protect and preserve the combat force.
- Take necessary, calculated risks.

8. Principle of Surprise

> *“Strike the enemy at a time or place or in a manner for which he is unprepared.”*

- A major contributor to achieving shock.
- Powerful but temporary.
- Factors to consider: speed, effective intel, OPSEC, variation of TTPs, and deception.
- Contributing factor: asymmetric capabilities.

9. Principle of Simplicity

“Prepare clear, uncomplicated plans and concise orders to ensure thorough understanding.”

- Simple plans executed on time are better than detailed plans executed late.
- Reduces misunderstanding and confusion.
- METT-TC will determine the degree of simplicity.

10. Principle of Perseverance

“Ensure the commitment necessary to attain the national strategic end state.”

- Patient, resolute, and persistent pursuit of national goals and objectives is often a requirement for success.
- May require years to reach the desired end state.

11. Principle of Legitimacy

“Develop and maintain the will necessary to attain the national strategic end state.”

- Operations or campaigns must be conducted according to Philippine / international laws and treaties.
- Develop or reinforce authority and acceptance.

12. Principle of Restraint

“Limit collateral damage and prevent the unnecessary use of force.”

- Requires careful and disciplined balancing of security, the conduct of military operations, and the desired strategic end state.
- Consistent with the inherent right of self-defense.

KNOWLEDGE CHECK

Check on Learning

The synchronized or simultaneous application of several Army-specific arms such as infantry, armor, field artillery, engineers, and aviation.	**Combined Arms**
Combat operations conducted to defeat an enemy attack, gain time, economize forces, and develop conditions favorable for offensive or support to civil governance operations.	**Defensive Operations**
The arrangement of battlefield activities in time and space to mass at the decisive point.	**Synchronization**
The related tasks and systems that facilitate understanding of the operational environment, enemy, terrain, and civil considerations.	**Intelligence**

QUESTIONS?

Summary

LEGAL BASIS OF PHILIPPINE ARMY OPERATIONS

- Art II, 1987 Constitution

ARMY OPERATIONAL PLATFORMS

- Multinational or Combined Operations
- Joint Operations
- Combined Arms Operations

ELEMENTS OF FULL SPECTRUM OPERATIONS

- Offensive Operations
- Defensive Operations
- Support to Civil Governance

Summary

TENETS OF ARMY OPERATIONS

- Initiative
- Agility
- Depth
- Synchronization

Assessment

The Assessment will be a Written Exam

(Single Response and True or False)

COURSE OUTCOME

Outcome

At this point, you should be able to explain the Principles of Army Operations and the Elements of Army Power.

END OF PRESENTATION
