Guide for Tactical Chat Configuration

Example

This guide is for use with the RF-7800H to be used with RF-6551H Tactical Chat version 2.0 and above, the guide assumes that the radio has a functioning mission plan loaded, an antenna connected and it is operating in a net with other RF-7800H radios with a common mission plan.

Steps to View IP Address

Take note of **IP Address** shown. Press **[CLR]** until radio returns to scanning; or press **[CLR]**, next **[PGM]** to returns on scanning.

Steps to View Radio Name

To find the radio name,
while the radio is scanning,
Press **[7OPT]**, use left/right arrow keys to select **RADIO > [ENT]**

Steps to View Radio Name

Cycle through the information by pressing **[ENT]** another **8 times** until **“RADIO NAME”** is displayed.

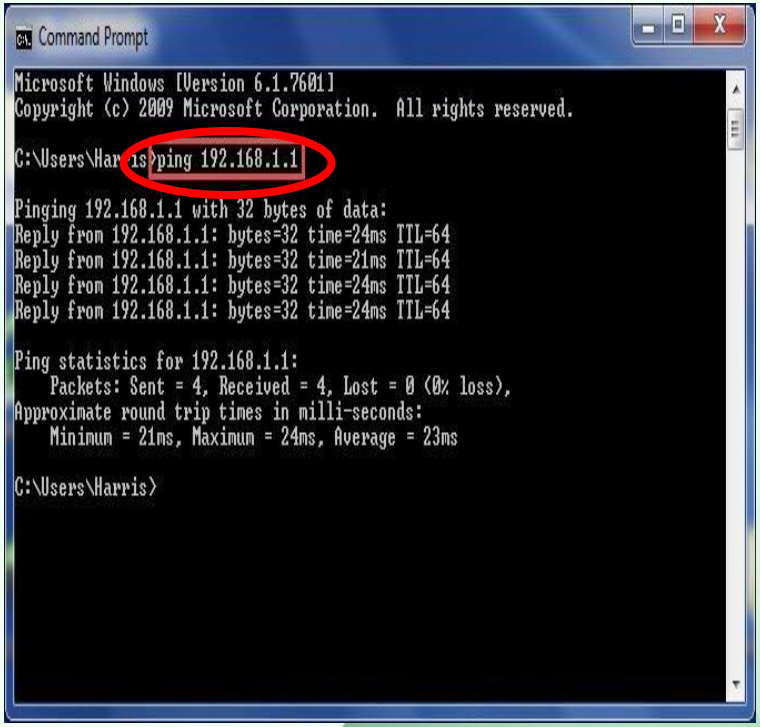

IP Configuration to PC

In Command Prompt;

Type “ping 168.254.78.1” replace this IP with your radio IP as shown in step 10.

The radio should reply as shown.

If no reply from radio, check physical connection to computer and check IP entered

Steps to Operate Tactical Chat

Open Tactical Chat from the desktop

#StrongerArmyStrongerCountry

Steps to Operate Tactical Chat

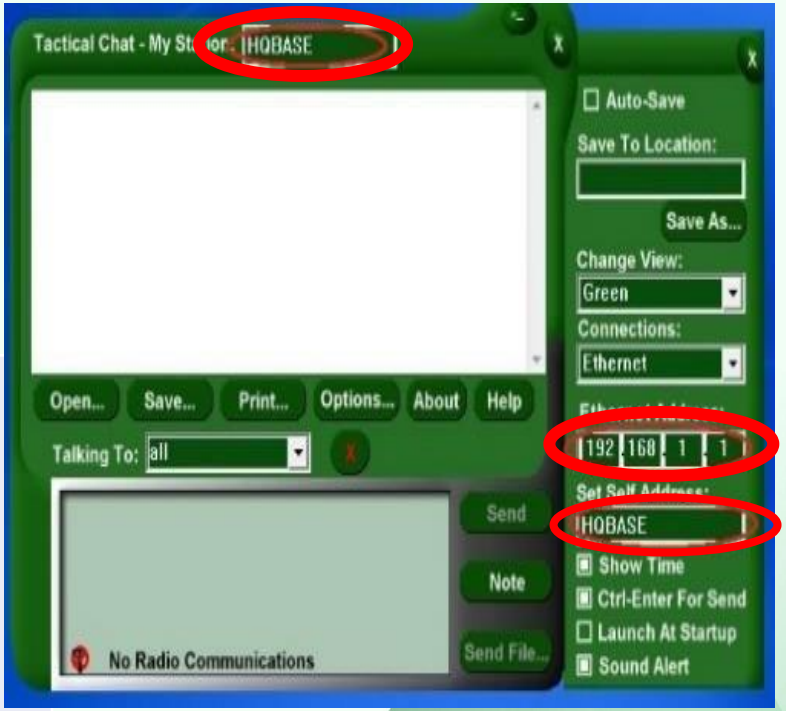

Tactical chat when opened will sometimes show, “No Radio Communications” at the bottom of the free text entry box. If Tactical Chat shows “Ready” it is ready to send a message. If it still shows “No Radio Communications” Click Options to expand the options panel.

Steps to Operate Tactical Chat

Enter the radio IP address in the Ethernet address field and enter the radio name exactly as it was shown on the radio in the “Set Self Address” field

To apply changes, close Tactical Chat and re-open to radio status will change to “Ready” and the radio name will appear at the top, under “My Station”.

Steps to Operate Tactical Chat

Type the name of the radio you are trying to send a message to in the “Talking To:” box, if it isn’t already listed in the drop-down menu.

Check the radio to ensure it is still scanning. If so, the user can begin to send messages through Tactical Chat.
